

# SECTIONAL OVERHEAD DOOR

## PRODUCT DESCRIPTION

### SECTIONAL OVERHEAD DOOR WAYNE DALTON, MODEL 2411<sup>®</sup>

Exterior skin is roll formed from commercial nominal 24 gauge continuous coil which is G-90 hot-dipped galvanized, acid treated and pre-painted with two coats of baked on .9 mil polyester paint, provides long life and attractive appearance.

"C"-shaped mutins and stiles are galvanized steel with pre-located holes for rapid hinge attachment. Mutins and end stiles fit the contour of the section and are attached to the shiplap with  $\frac{1}{8}$ " steel breakstem rivets and secured to the section with adhesive.

Galvanized steel retainer with "Bulb" Type Astral provides added protection against air and water infiltration.

End hinges are hot-dipped galvanized steel with ball bearing type rollers and hardened inner races.

**NOTE:**
