LOCK-IN PLUS WALL LINER

PRODUCT DESCRIPTION

LOCK-IN PLUS WALL LINER

The interior of the building shall be finished with a factory assembled insulated metal liner panel having no exposed fasteners except at the matching base, ceiling and accessory trim.

The wall liner system shall have a concealed insulating board of 1½" thick polyisocyanurate foam impaled on rib clips.

Liner panels shall be 16" wide, nominal 26 gauge, embossed, galvanized steel, pre-painted Arctic White. Insulation shall be non-combustible, nominal 1" thick, 2# minimum density fiberglass laminated to the liner panel.

The void between the exterior wall panel and the lock-in liner panel shall be insulated with 16" wide, 3½" thick R13 un-faced fiberglass insulation.
