## Your "Pick Me Up" Makes a Difference

### What determines the lifting method for your prefabricated building design?

While the argument can be made that in some industries, a bottom lift design is the established standard for a prefabricated building design, that doesn't mean that it's always the best method for *your* prefabricated building. Cost and Convenience can play a significant role in determining the lifting method of a building.

[Click here to read more about how the choosing the right lifting method can impact your bottom line.](#)

#### Top Lift Design Benefits:

- Lift stability

#### Bottom Lift Design Benefits:

- Higher lifting capacity

- Less equipment interference
- Reduced torsional loading
- Equipment reduction
- Placement ease
- Less structural support required in roof system

## A message from Bill Estep - President and CEO

### March Madness

March is one of my favorite months of the year. The annual collegiate basketball tournaments provide night after night of great competition, countless surprises and awesome performances. There were an estimated 70 million NCAA men's tournament brackets filled out this year. The stakes can be anything from serious prizes to simple bragging rights between friends, family members or coworkers. From computers to bracketologists to dogs that pick teams from cups of food, it seems like nearly everyone gets involved. No matter your knowledge or method of making your choice, what is the one thing that happens most often?
