Complementary Field Code Compliance Evaluation and Specification Development Services!

Complimentary Service

Complimentary Service

As we enter the holiday season, spending special time with our families, our thoughts also turn to you. Your well-being is important to us, so please consider our free assessment of your field equipment installation. We provide complimentary reports detailing critical code compliance issues to various national standards. You'll find us particularly knowledgeable regarding the National Electrical Code and the National Fire Protection Association Standard 496, for the protection of electrical equipment in chemical atmospheres.

We also provide prompt review and specification development assistance for modular metal, fiberglass and blast resistant buildings, stairs and platforms and HVAC, pressurization and gas phase filtration systems, to supplement your in-house resources. Count on Bebc as a partner to provide a safe environment for your workforce, knowing you can depend on our unbiased opinions regarding your new and retrofit construction projects!

Learn more about these complimentary services at 1-800-OK BEBCO - that's 652-3226. Your call will be answered immediately and directed to an associate with the specific knowledge of how best to address your needs! It's our gift to you, your colleagues, and your extended families and loved ones for many holidays to come!

Happy Holidays, and enjoy this precious time of year with your families!
