Versatility to Fit your Project & Industry Needs

Versatility is a key component of making our products an effective solution for a wide range of uses. At Parkline, we specialize in working with our clients to ensure that they are getting the right building for their industry and their application. We can assist with any number of application uses to fit your project needs for a wide range of industries such as Power Transmission or Generation, Oil & Gas, Wastewater, Renewable Energy, Telecommunications and more.

Buildings for Power Transmission

Parkline has worked with many of the owners, representatives, and EPC firms throughout the Power Transmission sector, building hundreds of site-constructed or turnkey substation control houses and SVC buildings for utilities. [View more examples of buildings supplied for Power Transmission.](#)

Buildings for Power Generation

Many of the country's key electricity producers have utilized Parkline's buildings for their needs and we specialize in structural and interior options for the power generation industry. [View more examples of buildings supplied for Power Generation.](#)

Buildings for the Oil & Gas Industry

Our heavy and light gauge building designs are widely known throughout the Oil & Gas sector and many of our installations can also be seen along the gas pipeline, from custom-designed canopies to site-constructed or modular buildings. Parkline facilities have extensive experience in the Oil & Gas Industry and can assist with both General Purpose and Hazardous Location area classifications. [View more examples of buildings supplied for the Oil & Gas Industry.](#)

Common Applications

Common applications include: Control Houses, Analyzer Buildings, Pump Houses, Measurement and Regulation Enclosures, Guard Shacks and MCC Enclosures. Parkline as a whole has expertise in these markets and applications. We have facilities in West Virginia and Texas that can better serve you, no matter where your project is located.

A message from Bill Estep - President and CEO

Last October, I told you about a story of a customer that needed a building with the exterior fabricated from stainless steel. The customer believed that erecting this building on their site would provide the best

cost and site coordination options. We teamed with an integration company and our field erection partners to combine design elements of a "Bebco" stainless steel exterior and "Parkline" interior to create a field erected stainless steel building.

Did you know? Parkline has acquired the assets of Bebcos Industries, Inc., and will be updating the product information and the web sites over the coming months.

[Read more information regarding the acquisition.](#)

Great product literature is only a click away!

We have included product literature library sections on our web sites where you may download and read more information about our dynamic line of shelters, buildings and other structures.

Just click on the different images above to take you to our Literature Libraries!
