Systems Integration for your building project... the Parkline difference

Although Parkline has established itself as an industry leading building manufacturer with diverse product options, Parkline also has a knowledgeable **Systems Integration** team with extensive experience and the skill sets that have allowed us to complete a large number of projects with intricate integration requirements for companies we've all heard of and know by name.

What makes Parkline's Systems Integration different?

- **Our staff:** Our in-house systems integration staff is made up of numerous industry professionals with years of hands-on experience in the field of electrical and mechanical integration. Working as a comprehensive team, they ensure that not only are all the details of the integration addressed, but that the building design is in total harmony with the electrical and mechanical needs of the project.
- **Project Management:** Our staff of professional project managers will assure your project completes on time. Whether it's helping develop a project plan; weekly communication meetings; coordinating FAT's; or confirming shipments, you can rest easy, because your Parkline Project Manager will keep you informed every step of the way from kick off to post installation.
- **Professionalism:** Code adherence and professional installations are minimum requirements for any project with Parkline. Clean wiring, accurate labeling and detailed design drawings are just the beginning, each aspect of your project is completed with absolute attention to even the smallest detail.
- **Application Diversity:** Parkline offers integration for Medium Voltage and Low Voltage systems, interconnection of **Switchgear, MCC (Motor Control Center) systems,** Marshalling panels, SCADA systems, DCS systems, Remote Control panels, Fire Alarm panels, MIMIC panels, PLC Panels, RIO (Remote Input/Output) panels and more.
- **Accurate Pricing:** Parkline doesn't consider change orders to be an alternative to providing our customers with accurate pricing from the start; and those pesky change orders are reserved for design and scope changes. Upon receipt of an RFQ, our application specialist, estimators, designers and manufacturing teams work hand-in-hand with our customers to ensure that when we provide a quote for your project, what you receive will be a comprehensive and all-inclusive price.

All these standards come together to ensure that when you have Parkline provide your integrated project, nothing is left to chance.

When the budget matters...

When the quality of the work matters...

When completing the project on time is important for you and your customers...

Contact our knowledgeable sales staff and let Parkline show you the difference!
