

Ultimate Protection Against Destructive Events!

Bebco Industries Blast Resistant Buildings, Shelters and Rooms are built to withstand destructive forces and catastrophic events such as:

- Blasts & Explosions
- Extreme Heat, Flame & Smoke
- Toxic & Lethal Chemicals
- Extreme Noise & Vibration
- Earthquakes
- Hurricanes
- Tornadoes
- Forced Entry Attempts
- Ballistics & Flying Projectiles

Through careful analysis of your specific application, we will ensure your Blast Resistant Building is engineered to provide superior protection for your equipment and personnel according to your exact specifications!

Precise Engineering & Flexible Manufacturing Capabilities!

**Ballistic & Blast
Resistant Windows**

**Interior Blast Resistant
Wall Surface**

**Blast & Vibration
Resistant Base**

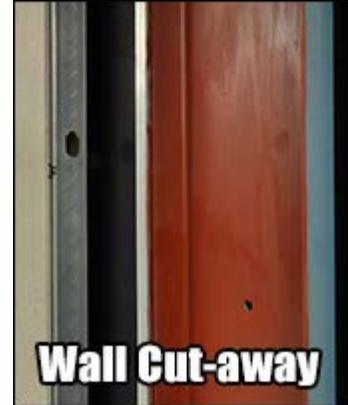

Our rigid construction methods allow our clients complete utilization of the interior space without the worry of wall mounted equipment becoming a projectile during a cataclysmic event.

Learn more about this important feature...

Bebco applies numerous construction techniques and utilizes a broad range of equipment and materials:

- Hardened & Armor Plated Steel
- Structural Steel Beams & Tubing
- Specialized Flame Barrier Coatings
- Specialized High Temperature Coatings
- Fire Resistant & Fire Retardant Insulation
- Noise Absorption & Suppression Insulation
- Kevlar Sheeting & Multi-Layer Fiberglass Laminates
- Blast & Ballistic Resistant Windows & Security Doors
